IMO — The World's Finest

Getting Started:

1. Connect the 24VDC power as shown on the connector below.
2. Install i^3 Configurator onto your PC.
3. Connect serial programming cable into port MJ1 port.
4. If using a USB to serial convertor (PC501), please check in Window Device Manager which com port has been assigned. Then enter menu Tools->Editor Options-> Communications port->Configure, and set accordingly.
5. Press the up and down arrows simultaneously on the front of the unit and check Network ID. Then press the target sign in the Configurator and make the Target ID match that of the i^3
WARNING: Please ensure power is ON and i^3 is in Idle mode before inserting SanDisk™ MicroSD.
